Bright Chrome

HINGE

Durable, smooth-operating hinges designed for stable door movement and long-lasting performance. Ideal for residential and commercial doors, they offer reliable support for various door types, easy installation, and a clean, modern design that complements any interior style.

Hinge Types

- Ball Bearing Hinge
- Butterfly Hinge
- Self Closing Hinge

FINISH, CORNER & SIZE

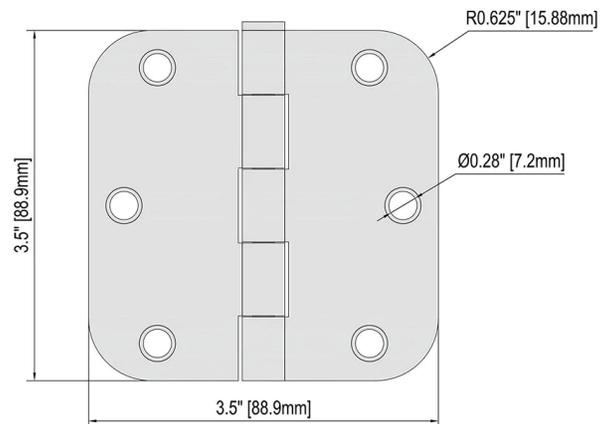

Available in multiple finishes to match different door styles. Corner types include both rounded (R-corner) and square options for flexible installation. Multiple sizes are offered to accommodate various door weights and thicknesses.

Matte Black

Satin Nickel

HINGE

BALL BEARING HINGE

Engineered with ball bearings for smooth, quiet operation and long-lasting durability. Ideal for heavy doors or high-traffic areas.

Black Pin Hinge
3.5"×3.5"

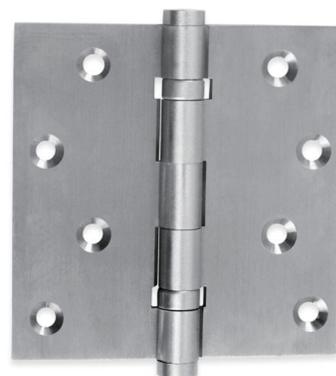

Brushed Nickel Pin Hinge
3.5"×3.5"

BUTTERFLY HINGE

Classic hinge offering stable support. Ideal for pre-finished doors, allowing easy surface installation without cutting mortises.

Matte Black Pin Hinge
4"×4"

Ball Bearing Hinge
4"×4"

SELF CLOSING HINGE

Spring-loaded hinge that automatically closes doors, enhancing convenience and security. Suitable for use on standard doors as well as fire-rated doors.

Butterfly Hinge
4"×3"×3mm

Self Closing Hinge with UL stamp
4.5"×4"×3.4mm

BARN DOOR HARDWARE

Available Track Lengths: 78 3/4" (2.0 m), 96" (2.44 m)

Smooth-sliding barn door hardware designed to ensure stable movement and reliable performance. Engineered with strong track systems and precision rollers, it provides excellent load capacity, easy installation, and a clean, modern appearance while maximizing space efficiency for interior doors.

Track Joint Type

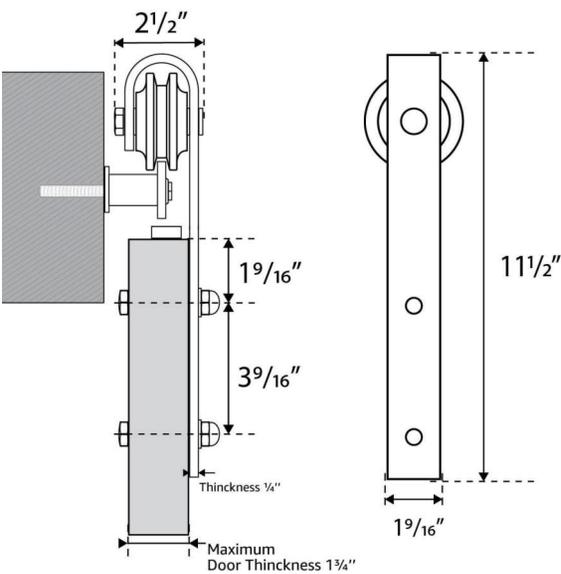

- Dovetail Joint Track
- Single-Piece Track

SIZE & FINISH

Available in standard lengths to fit most doors. Commonly offered in sleek black finish to match modern interiors.

(Unit: Inch)

Satin Nickel

POCKET DOOR HARDWARE

Premium hardware designed specifically for pocket doors, allowing smooth, quiet sliding fully recessed within the wall. Engineered for easy installation and reliable operation, it ensures efficient, space-saving movement while providing long-lasting, stable performance.

Door Height Options

80" - includes soft-close

84" - includes soft-close

96" - includes soft-close

SOFT-CLOSE FEATURE

Integrated soft-close functionality gently slows and stops doors, preventing sudden impact and reducing noise. This mechanism enhances safety, protects the door and wall, and provides a premium, controlled user experience.
